

FRONTALI

CHE COS'È UN FRONTALE?

La caratteristica principale di un frontale è quella di fissare l'incontro elettrico al telaio della porta. L'inserimento del frontale consente di proteggere l'incontro elettrico e di rendere più fluido lo scorrimento dello scrocco.

TIPOLOGIA

CORTO

I frontali corte sono progettate per porte in cui non è richiesto un sistema di chiusura a catenaccio.

LUNGO

I frontali lunghi sono progettati per le porte che richiedono un sistema di chiusura a catenaccio.

Questi frontali sono dotati di una apertura che consente di inserire il catenaccio o i catenacci.

FORME

Oltre alla tipologia in termini di dimensioni, frontali corti o lunghi, esistono anche forme angolari, con bordi arrotondati, speciali per porte in legno, ecc...

GRAZIE AL TAGLIO LASER POSSIAMO REALIZZARE QUALSIASI FORMA.
